Description:

AAG is organizing a series of roundtable discussions to prepare the outline for an "AAG Education Summit" at the 2025 Annual Meeting in Detroit (MI) that will offer networking, mentoring, and professional development for educators covering geography in K-12 and/or higher education.

WHY THIS ROUNDTABLE?

Part of AAG's JEDI Strategic Plan is to hold roundtable discussions to foster collaboration between AAG, K-12 teachers, community college educators, and post-secondary geographers. Based on recommendations from the Encoding Geography Initiative and the National Center for Research in Geography Education, building "bridges" between K-12 and higher education should be a key strategy moving forward. Depending on who you ask, however, you will hear a different idea on what that "bridge" could look like, and to what level AAG should or shouldn't be involved. The goal of these roundtable discussions is to bring all these "bridge" ideas together.

WHO DO WE WANT AT THE TABLE?

We are open to anyone who would like to contribute to these conversations, but among those who we would like to see represented during at least one of our Roundtable Discussions are (in no particular order): Geography educators in K-12 and community colleges, the AAG Community College Affinity Group, the AAG Geography Education Specialty Group, representatives from the National Council for Geographic Education (NCGE), representatives from the National Center for Research in Geography Education (NCRGE), representatives from the AAG Healthy Department Committee, representatives from the AAG JEDI Committee and its TLC GRAM Working Groups, representatives from former or

teacher trainers, etc.

If you think of anyone else or other organizations should be involved in these conversations, please don't hesitate to reach out or to join the conversation to let us know!
