Description

Understanding the causes of differential divergence patterns in nature is a longstanding challenge in evolutionary biology. While external factors such as landscape change or selective pressures have been commonly proposed as the main drivers of differentiation, the intrinsic features of...

The ASU Library acknowledges the twenty-three Native Nations that have inhabited this land for centuries. Arizona State University's four campuses are located in the Salt River Valley on ancestral territories of Indigenous peoples, including the Akimel O'odham (Pima) and Pee Posh (Maricopa) Indian Communities, whose care and keeping of these lands allows us to be here today. ASU Library acknowledges the sovereignty of these nations and seeks to foster an environment of success and possibility for Native American students and patrons. We are advocates for the incorporation of Indigenous knowledge systems and research methodologies within contemporary library practice. ASU Library welcomes members of the Akimel O'odham and Pee Posh, and all Native nations to the Library.
