

5th World Congress on Integrated Computational Materials Engineering

ISSN: 1073-5623 (Print) 1543-1940 (Online)

In this topical collection (4 articles)

1. 5th World Congress on Integrated Computational Materials Engineering
[Exploring Correlations Between Properties Using Artificial Neural Networks](#)
Yiming Zhang, Julian R. G. Evans...Pages 58-75
[Download PDF \(1700KB\)](#) [View Article](#)

2.

5th World Congress on Integrated Computational Materials Engineering
[Recrystallization and Grain Growth Simulations for Multiple-Pass Rolling and Annealing of U-10Mo](#)

William Frazier, Chao Wang, Zhijie Xu...Pages 533-544

3.

5th World Congress on Integrated Computational Materials Engineering
[Phase-Field Modeling of Microstructure Evolution in the Presence of Bubble During Solidification](#)

Ang Zhang, Jinglian Du, Xiaopeng Zhang...Pages 1023-1037

4.

5th World Congress on Integrated Computational Materials Engineering
[Predicting Twin Nucleation in a Polycrystalline Mg Alloy Using Machine Learning Methods](#)

Zhouuo Tong, Leyun Wang, Gaoming Zhu...Pages 5543-5560
