Erratum: Scanning Ion Conductance Microscopy of Nafion-Modified Nanopores [J. Electrochem. Soc., 170, 066510 (2023)]

To cite this article before publication: Kristen Alanis *et al* 2023 *J. Electrochem. Soc.* in press <https://doi.org/10.1149/1945-7111/acf793>

Manuscript version: Accepted Manuscript

Accepted Manuscript is “the version of the article accepted for publication including all changes made as a result of the peer review process, and which may also include the addition to the article by IOP Publishing of a header, an article ID, a cover sheet and/or an ‘Accepted Manuscript’ watermark, but excluding any other editing, typesetting or other changes made by IOP Publishing and/or its licensors”

This Accepted Manuscript is © 2023 The Electrochemical Society (“ECS”). Published on behalf of ECS by IOP Publishing Limited.

This article can be copied and redistributed on non commercial subject and institutional repositories.

Although reasonable endeavours have been taken to obtain all necessary permissions from third parties to include their copyrighted content within this article, their full citation and copyright line may not be present in this Accepted Manuscript version. Before using any content from this article, please refer to the Version of Record on IOPscience once published for full citation and copyright details, as permissions will likely be required. All third party content is fully copyright protected, unless specifically stated otherwise in the figure caption in the Version of Record.

Erratum: Scanning Ion Conductance Microscopy of Nafion-Modified Nanopores [J. Electrochem. Soc., 170, 066510 (2023)]

Journal:	<i>Journal of The Electrochemical Society</i>
Manuscript ID	JES-110882.R1
Manuscript Type:	Erratum
Date Submitted by the Author:	06-Sep-2023
Complete List of Authors:	Alanis, Kristen; Texas A&M University System, Department of Chemistry Siwy, Zuzanna; University of California Irvine, Baker, Lane; Texas A&M University System, Department of Chemistry
Keywords:	Electroanalytical Electrochemistry, Membranes and Separators, Nanoscale materials
