

Research Analytics: Where do I start?

Andrea Christelle-Diné College
Lori Schultz-University of Arizona

Intro & Opening Comments

What weeks/months of data analysis looks like...

The Research Enterprise at a Glance

615

patents issued

2,753

invention disclosures

#6

NASA-funded activity

#1

top producer of Fulbright U.S.
Scholars

537

licenses and options for
university inventions

Top 20

in R&D expenditures among
public universities

BY THE NUMBERS

No. 1

ASTRONOMY &
ASTROPHYSICS
R&D Expenditures

No. 2

WATER RESOURCES
in the U.S. (No. 6 in the
world)

No. 3

HIGH HISPANIC-
ENROLLMENT IN
RESEARCH ACTIVITY
in U.S. Institutions

No. 6

NASA-FUNDED ACTIVITY
among public universities

No. 7

PHYSICAL SCIENCES
R&D Expenditures

ENTREPRENEURSHIP (as of FY23)

2,753 invention disclosures
knowledge development that
can change the world

537 licenses & options
for university inventions

615 patents issued
Ranked no. 28 among
worldwide universities granted
U.S. utility patents

135 startups launched
commercializing UArizona
inventions

\$1.61B in economic output
from commercialization
activities between FY17-FY21

LAND-GRANT MISSION

With offices in all 15 counties, UArizona
Cooperative Extension is critical to our land-grant

TOP 20 IN R&D EXPENDITURES

HERD* FY23 Funding Sources in Millions

Diné College

36 applications submitted

23 funded

13 not funded

Funding success rate: 64%

Value of Applications Submitted: \$30,337,016

Value of Applications that were Funded: \$12,798,142

Average award: \$556,441

36 submissions

School distribution

Identifying the initial need

- We all start from the same place: a leader wants an answer to a question that requires data
- Examples:
 - # of proposals and awards - by PI/Department/College
 - Success rate of submitted proposals - “win rate”
 - What are your examples?

Where to start?

- What do you already have? Are you collecting the data in some fashion?
- What kinds of reports already exist at your institution?
- What does your institution need, and do you have influence in defining that?

Who is asking, and why?

- Why do they need the information?
- What does their request look like (are they asking the right question)?
- Who else might need to know - about the request, or the results?

Access Needs

- What data do you have/need access to?
- Who else might have access to get the data?
- Do you need to follow a process to get appropriate access?
- Depending on your organization, this may be the hardest part.

Who else might be involved?

- Who cleans the data?
- Who updates the data and how?
- Who else might you work with to get data/write reports/share output

Other needs

- Can data help shorten processes?
- Can data help you anticipate needs?
 - Staffing/resources
 - Planning
 - Turnaround time
- How does data help you do your job?

Tools

- Excel: it's more powerful than you think!
- Tableau Public: free public version to use & share, lots of available training
- Power BI: part of the Microsoft suite(O365), but also a free version
- Your eRA system
- Federal agency tools - NIHReporter, USASpending.gov, HERD, etc
- Airtable - allows sharing of databases via cloud (free version)

What will Chat GPT tell you?

How do tools help get beyond the basics?

- Spotting trends & patterns
- Automation
- Regular sharing to leadership, others
- Reaching back into data collection & integrity
