Author Correction

Volume 7, Issue 5, e00562-22, <https://doi.org/10.1128/msystems.00562-22>

Figure 6: The branch tip labels for the type 3 secretion system phylogeny contain errors. The labels indicate the range of gene IDs that make up each secretion system and two of the original *P. bonniea* labels and an original *P. hayleyella* label were off by one gene. The figure should appear as shown in this Author Correction. These corrections do not affect the results and the conclusion.

Figure S4 in the supplemental material: The branch tip labels for the type 3 secretion system phylogeny contain errors. The labels indicate the range of gene IDs that make up each secretion system and two of the original *P. bonniea* labels and an original *P. hayleyella* label were off by one gene. The figure should appear as shown in this Author Correction. These corrections do not affect the results and the conclusion.

We apologize for any inconvenience caused by these errors.
